

Effects of Prenatal Drug & Alcohol Exposure

Schedule

Rachelle Tyler, M.D., M.P.H.

- 8:45—10:15 Introduction to Prenatal Drug Exposure
Medical Concerns
Developmental Concerns
- 10:15-10:30 Break
- 10:30-12:00 Social Issues
Interventions
Questions

Awards Luncheon 12-1:30

Blair Paley, Ph.D.

- 1:30-1:45 Introduction, Overview & Goals of Presentation
- II. Significance/Scope of Problem
- A. Fetal Alcohol Spectrum Disorders (FASD) as a major public health concern
 - B. Prevalence of alcohol use among pregnant women
 - C. Prevalence of FASD
 - 1. General population
 - 2. High risk populations
- 1:45-2:30 III. Clinical Presentation
- A. Diagnostic Criteria
 - B. Clinical Features
 - C. Course and Prognosis
- 2:30-3:00 IV. Evaluation of FASD
- A. Challenges to the early identification of FASD
 - B. Importance of early identification
 - C. Comprehensive approach to evaluation
- 3:00-3:15 BREAK
- 3:15-4:30 V. Early Intervention for FASD
- A. Treatment considerations
 - B. Treatment challenges
 - C. Treatment components
 - D. Evidence-based interventions for FASD
 - E. Adapting evidence-based strategies for use in clinical practice
 - F. Resources for professionals and families

“Effects of Prenatal Drug & Alcohol Exposure”

Rachelle Tyler, M.D., M.P.H.

&

Blair Paley, Ph.D.

Learning Objectives

Dr. Rachelle Tyler’s workshop is targeted towards a beginning and intermediate audience.

The schedule is as follows:

1. As a result of this training participants will be able to describe some of the issues surrounding research in the area of prenatal drug exposure.
2. As a result of this training participants will be able to list 3 medical concerns for children with prenatal drug exposure
3. As a result of this training participants will be able to list 3 developmental concerns for children with prenatal drug exposure

Dr. Blair Paley’s workshop is targeted towards a beginning and intermediate audience.

The schedule is as follows:

1. Participants will be able to describe the effects of prenatal alcohol exposure on children’s early development and functioning.
2. Participants will be able to describe how parents and caregivers can play an important role in ameliorating some of the secondary disabilities associated with prenatal alcohol exposure.
3. Participants will be able to incorporate knowledge about the impact of prenatal alcohol exposure into their own clinical practice with young children.
4. Participants will be able to identify and access useful resources for professionals working with parents and families of children with prenatal alcohol exposure.
